### FINAL REJECTION

This office action is in response to the amendment and remarks filed 09/19/2007.

#### *Response to Arguments*

1. Applicant's arguments with respect to claims 1, 2, 3, 6, 8 and 15 have been considered but are moot in view of the new ground(s) of rejection necessitated by the amendment.

#### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1, 2 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites "such that **air** is..." in line 11. It is unclear from the claim whether the recitation "...air.." is referring back to the **compressed air from the gas turbine noise suppression system** (see line 9 of claim) or to **the discharge air from the tubes** (see line 7). Further, the claim as written fails to positively recite the relationship/connection between the noise suppression system and the plurality of tubes. Is the compressed air from the noise suppression system the same as the discharge air from the tubes?. If this is the case, applicant should clarify the claim by stating something like --channeling compressed air from the gas turbine engine into the manifold that supplies compressed air to the plurality of azimuthally arranged tubes--. Appropriate correction is required.

Claim 2 recites "such that **air** ..." in line 3. It is unclear from the claim whether the recitation "...air.." is referring back to the **compressed air from the gas turbine noise**

Art Unit: 3746

**suppression system** (see line 9 of claim 1) **or to the discharge air from the tubes** (see line 7 of claim 1). Appropriate correction is required.

Claim 15 recites "...to said gas turbine nozzle..." in lines 6-7. It is unclear from the claim whether this recitation is referring back to the **fan nozzle** (see line 3 of claim 15) **or to the core nozzle** (see line 2 of claim 15). Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 2, 3, 6, 8 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by FR 1.157.063 (reference provided/submitted by applicant).

FR'063 teaches (see particularly figures 3, 4) a gas turbine engine comprising: a core nozzle, a fan nozzle, and a noise suppression system comprising: a plurality of azimuthally arranged tubes 5 around the core engine nozzle and a manifold supplying compressed air to said plurality of tubes, wherein said noise suppression system is selectively operable (selectively turning on/off as needed all or some of the tubes) to facilitate generating a plurality of flow control mechanisms (different flow mechanisms depending on the selectively selected operation) to suppress noise generated by the engine.

With regards to the method claims, since FR'063 has the same structure as claimed, it is inherent that FR'063's device would be able to perform the recited method steps.

***Allowable Subject Matter***

6. Claims 4, 5, 7, 9-14 and 16-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
